Landcare Is For Everyone

Our mission is to connect community and protect the biodiversity of Cardinia Creek catchment through humane deer reduction and effective management strategies.

We're caring for the Upper Cardinia Creek catchment and the wildlife and communities it supports.

ABOUT US

Cardinia Deer Management Coalition is a community-driven organisation, dedicated to protecting the biodiversity of Cardinia Creek catchment. Our group specialises in humane and effective feral deer management, connecting landowners with trained and vetted deer controllers.

We work with councils, government agencies and other organisations to advocate for ethical and practical deer management solutions to safely reduce the impact of invasive deer species on our natural environment.

We offer a unique matchmaking service for landowners that pairs them with highly trained and vetted deer controllers. The professionals we recommend are committed to humane methods and place safety above all else.

With neighbours working collectively throughout the catchment on collaborative deer control, we have a better chance at protecting our unique local environment for endangered species like Helmeted Honey Eaters.

Collaboration is central to our approach, and our strong partnerships mean we can leverage a wide range of expertise and resources to achieve community goals.

At our meetings, we encourage all members to actively participate by sharing experiences and opinions so that others may learn. Our open coalition is committed to community safety and inclusion, and we value win-win partnerships.
