## **Landcare Is For Everyone**

Our mission is to connect horse owners with the information, experts and resources that help them implement best-practice to benefit both their horses and the broader environment.

*Together, we're caring about horses, their owners and the land on which we all live.*

## ABOUT US

Established in 2023, the Cardinia & West Gippsland Equine Landcare Group (CWGELG) unites horse owners and land managers passionate about sustainable, healthy environments. We operate under the auspices of Western Port Catchment Landcare Network and serve the same area.

We work in collaboration with the Network, Melbourne Water, the Victorian Equine Landcare Community of Practice and other regional equine groups to promote biodiversity, soil health, and best practice in equine care.

Our group offers workshops, webinars, and farm visits to members, covering a broad range of topics that influence equine and land health – including grazing, weed and soil management, and fire preparedness.

Membership includes access to guest speaker events and workshops, and supports a Community of Practice for horse welfare and equine land management across the region.

We are recipients of a 2025 Melbourne Water Grant aimed towards *Establishing and Supporting Healthy Land Management for Equine Properties.*

Our group provides a platform for horse owners and land managers who are passionate about sustainable, healthy environments. Our workshops and farm visits aim to extend everyone's knowledge through peer-to-peer learning.
